VII. Letter from the Superintending Engineer with report, plans and estimates for constructing a dam across the valley below Sankey's Reservoir and laying pipes for distributing water in the town.

Resolution.—The scheme now before the Board to supply the Town with perfectly pure water is a highly desirable one, and it has been fully investigated by the Government professional officers. Two alternative estimates are submitted, one for providing stoneware pipes, and the other cast-iron pipes. After discussing the subject fully and also after hearing the explanation kindly afforded by Mr. Sauldwell at the meeting on the subject, the Board have come to the conclusion to adopt the estimate for laying iron pipes, which is estimated to cost Rs. 94,056. But the Commissioners consider that it would be beyond their means to undertake the work causing such a heavy outlay. They therefore resolve that Government be respectfully requested to direct the work to be carried out by the Public Works Department from Provincial Funds and thereby confer a lasting boon on the inhabitants of this rapidly increasing town. If this proposal should not meet with the approval of Government, then the Commissioners would solicit the Government for a loan of Rs. 84,000 without interest to be repaid by annual instalments.
